DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2, 7-8, 13, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable Bodnar et al. (US 2004/0218045).

As to claims 1, 7, 13, and 19, Bodnar et al. teaches a system and method for provisioning of new user accounts that allow new users of cellular phone to use features and services of the device without activating a new user account in which vendor / manufacture of cellular phones provide user unique ID or phone number (see Abstract; [0017]), storing a provisioning ID data in the back-end database (paragraph [0092]); receiving the provisioning information from the ID module (paragraph [0092]).

Bodnar et al. does not specifically teach receiving an inquiry comprising the unique ID number assigned to the device that initiated from the device to the pre-provisioning server at the pre-provisioning contact; and responding to the inquiry with a response that includes the provisioning contact that was stored in associate with the unique device ID number of the device.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the above-mentioned features into the teachings of

Art Unit: 2614

Bodnar in order to have a more efficient system by assigning the unique ID number to the device when the device is purchased by a customer.

As to claims 2 and 8, Bodnar et al. teaches the step of responding to the inquiry are performed over a hyper text transport protocol link initiated by the device to the pre-provision server (paragraph [0087] and [0088]).

Allowable Subject Matter

3. Claims 3-6, 9-12, 14-18, and 20-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Anderson et al. (U.S. Patent 6,636,259) teaches automatically configuring a web-enabled digital camera to access the Internet.

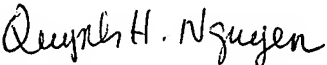

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quynh H. Nguyen whose telephone number is 571-272-7489. The examiner can normally be reached on Monday - Thursday from 6:30 A.M. to 5:00 P.M.
